EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone/facsimile interview (see PTO-413B) with Douglas Holtz on March 14, 2006.

The application has been amended as follows:

SPECIFICATION

Page 46, line 1 – please change “*circuit sells*” to “**circuit cells**”.

Page 50, last paragraph (three lines from the bottom) – please change “*CMS imager*” to “**CMOS imager**”.

CLAIMS

Claim 52: line 39, delete “thereof”
line 44, delete “thereof”.

Allowable Subject Matter

2. **Claims 2, 5-12, and 52** (renumbered, 2, 3-10, and 1, respectively) are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 52 (Currently Amended) is allowed because the prior art does not teach or fairly suggest an apparatus for capturing an image of an object, comprising:

wherein the controller controls the first group circuit cells and the second group circuit cells to simultaneously commence respective photoelectric converting actions in response to the image-capturing start signal, wherein the controller measures a signal value of at least one circuit cell selected by the controller in the second group circuit cells while the first group circuit cells are performing the photoelectric converting action, and wherein the controller stops the photoelectric converting action of the first group circuit cells when the signal value reaches a predetermined value, in combination with the other claimed elements.

Claims 2 and 5-12 are allowed because they are dependent on claim 52.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Ide et al. (6,819,360)	A first photoconductive element group and a second photoconductive element group outputting first and second video signals, respectively.
Nishizawa et al. (4,471,228)	A solid-state image sensor which detects the quantity of light incident on the image sensor during exposure and performs exposure control based on the obtained exposure value.
